

## "GEOMETRY OF ROOFS" - EXHIBITION OF STUDENTS' WORKS

In March 2013, in the hall of the Faculty of Civil Engineering of the Silesian University of Technology has been organized an exhibition of students' works titled "Geometry of roofs". The presented works has been prepared in the winter semester of the academic year 2012/2013, as the final design of the course "Descriptive Geometry and Technical Drawing."

Selected works are, in the opinion of the team's Center for Geometry and Engineering Graphics with the teacher "Geometry and Technical Drawing" at the Faculty of Civil Engineering, distinctive works. Work inserted by students in their preparation was worth emphasizing, honor and reward by presenting projects at the Faculty Board.

We hope, that its first success of our students in their university career will be an excellent start to a great adventure, which may be the acquisition of knowledge.
